

WATCH YOUR ENERGY SAVINGS GROW

Help the environment, reduce your carbon footprint
AND SAVE MONEY!

Save up to 50% off your lighting bill by replacing your existing Switchstart and Quickstart fluorescent tubes. Our system uses your existing T8 or T12 fittings, so it's simple, safe and very cost effective – most paybacks are within 2 years.

Onsite Renewables offer free low energy lighting surveys and quotes for the supply and installation of low energy lighting. We are working with a team of electricians who can complete the installation so you can start saving immediately!

What our clients are saying:

We are constantly looking for ways of reducing our energy consumption and our energy spend. Onsite Renewables help us to come up with ideas as to how we can do that.
Paul Eggleton, Energy Manager, O2

Onsite Renewables helped us identify a 'quick win' project to enhance energy efficiency of our internal lighting without having the cost and disruption of actually changing fittings. The process of surveying/quoting/installing was very quick, and installation phase was delivered in a flexible and well communicated way, without undue disruption to front-line services.
Graham Bell, Head of Capital Projects, NHS Hertfordshire

It was Onsite Renewables absolute independence that led us to select them as our partner. Most other companies were limited to a particular field or to a specific technology. Onsite Renewables have access to all of the latest technologies and will independently assess which ones will work for you. Also, technology is constantly evolving and you want to make sure that you get the latest product with a decent shelf-life so you do not have to repeat the process in a few years time, costing you more time and money.
Rob Grant, Estates Director, Berkhamsted Collegiate School

Having been awarded the Green Flag for being a Green School we are always looking at ways to further reduce our carbon emissions and energy costs, so, we were very interested when Onsite Renewables made contact to demonstrate their internal lighting system. Following the initial meeting the survey, quote and calculations of how much energy we would save followed very quickly. Having agreed to proceed the installation was done at a time suited to us and was amazingly quick with very little disruption.
**Lynda Read, Finance Officer,
Great Missenden C of E Combined School**

2 Year Warranty

All units are backed by a no-hassle full replacement warranty against manufacturing fault or failure in operation during the first two years of use

The benefits:

- Low cost
- Significant energy savings
- Rapid payback
- Extended lamp life
- Lower heat output
- Less maintenance demands
- 2 year warranty
- Free lighting survey and quote
